Nevada Households by Type: 2004

Category	Number (Estimate)
Family households (families)*	560,310
With own children under 18 years	269,606
Married-couple families	415,049
With own children under 18 years	185,286
Female householder, no husband present	109,362
With own children under 18 years	68,276
Nonfamily households	311,605
Total households	871,915
Average household size**	2.64
Average family size***	3.27

Note: The 2004 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters.

*"A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone."

**"A measure obtained by dividing the number of people in households by the total number of households (or householders)."

***"A measure obtained by dividing the number of members of families by the total number of families (or family householders)." From U.S. Census Bureau, "American Factfinder Glossary," available online at: <http://factfinder.census.gov/home/saff/main.html?_lang=en> as of 9/12/05.
