## Profile of Asian/Pacific Islander Children in Nevada

In 2000, 4.0 percent of the population ages 17 and under in Nevada was Asian/Pacific Islander. In 2012, the percentage was 7.0, a 75.0 percent or 3.0 percentage point increase from 2000. This *Newsletter* provides a profile of Asian/Pacific Islander children and youth, using data from the *Nevada KIDS COUNT Data Book 2012* and the Annie E. Casey Foundation (AECF) Data Center.

### *Demographics*

- In 2012, 7.0 percent of the population ages 17 and under in Nevada was Asian/Pacific Islander, making this group the fourth largest racial/ethnic group in Nevada.
- Among the 17 counties in Nevada, in 2012, Clark County had the highest percentage of Asian/Pacific Islander children/youth (7.9).

### *Health Conditions and Health Care*

- About 10 percent of births to Asian/Pacific Islander mothers were low-birthweight in 2011. This figure is the highest among the racial/ethnic groups.
- About 9 percent of births to Asian/Pacific Islander teens ages 15 to 19 in 2011 were low birthweight.
- For 2009-2011, the average teen birth rate for Asian/Pacific Islander teens was 19.5 per 1,000 females ages 15 to 19.
- About 36 percent of Asian/Pacific Islander teens ages 15 to 19 delayed prenatal care in 2011, and 14.3 percent received no prenatal care.
- As of enrollment beginning January 2013, 2.5 percent of the children ages 18 and under enrolled in Nevada Check Up were Asian/Pacific Islander.

### *Economic Well-Being*

- Thirteen percent of Asian/Pacific Islander children under age 18 lived in poverty during 2011.<sup>1</sup>

### *Education*

- In 2011-2012, 24,794 Asian/Pacific Islander children and youth were enrolled in prekindergarten through twelfth grade in Nevada public schools. At 5.6 percent, Asian/Pacific Islander students were the fourth largest segment of the school population. The largest segment was Hispanic (39.6 percent), followed by white (37.4 percent).
- The high school dropout rate for Asian/Pacific Islanders was 3.0 percent in 2010-2011.

---

<sup>1</sup>“The share of children under age 18 who live in families with incomes below the federal poverty level, as defined by the U.S. Office of Management and Budget. The federal poverty definition consists of a series of thresholds based on family size and composition. In calendar year 2011, a family of two adults and two children fell in the ‘poverty’ category if their annual income fell below \$22,811. Poverty status is not determined for people in military barracks, institutional quarters, or for unrelated individuals under age 15 (such as foster children). The data are based on income received in the 12 months prior to the survey.” Data and definition retrieved from the AECF KIDS COUNT Data Center, <http://www.datacenter.kidscount>.
